

Your Showroom Experience @ MYBOTSHOP

Experience Robotics -
Your Entry into Real-World Applications

Our Showroom

Address

Willy-Messerschmitt-Strasse 19
50126 Bergheim
Germany

Opening Hours

Wednesday 12 - 14
Thursday 10 - 12

What to bring

- Your challenges or ideas related to robotics
- Your applications
- Topics to get clarity on

Location Access

- Right off A61
- 1st Floor Showroom - no elevator
- No dedicated parking on-site - Street Parking is available

Contact Information

Lukas Echelmeyer
Project Manager

Agenda

01

Get to know Mybotshop

Brief introduction to who we are, what we do, and how we work

02

Understanding the landscape

Overview of robotics technologies and typical application areas

03

Experience robotics in action

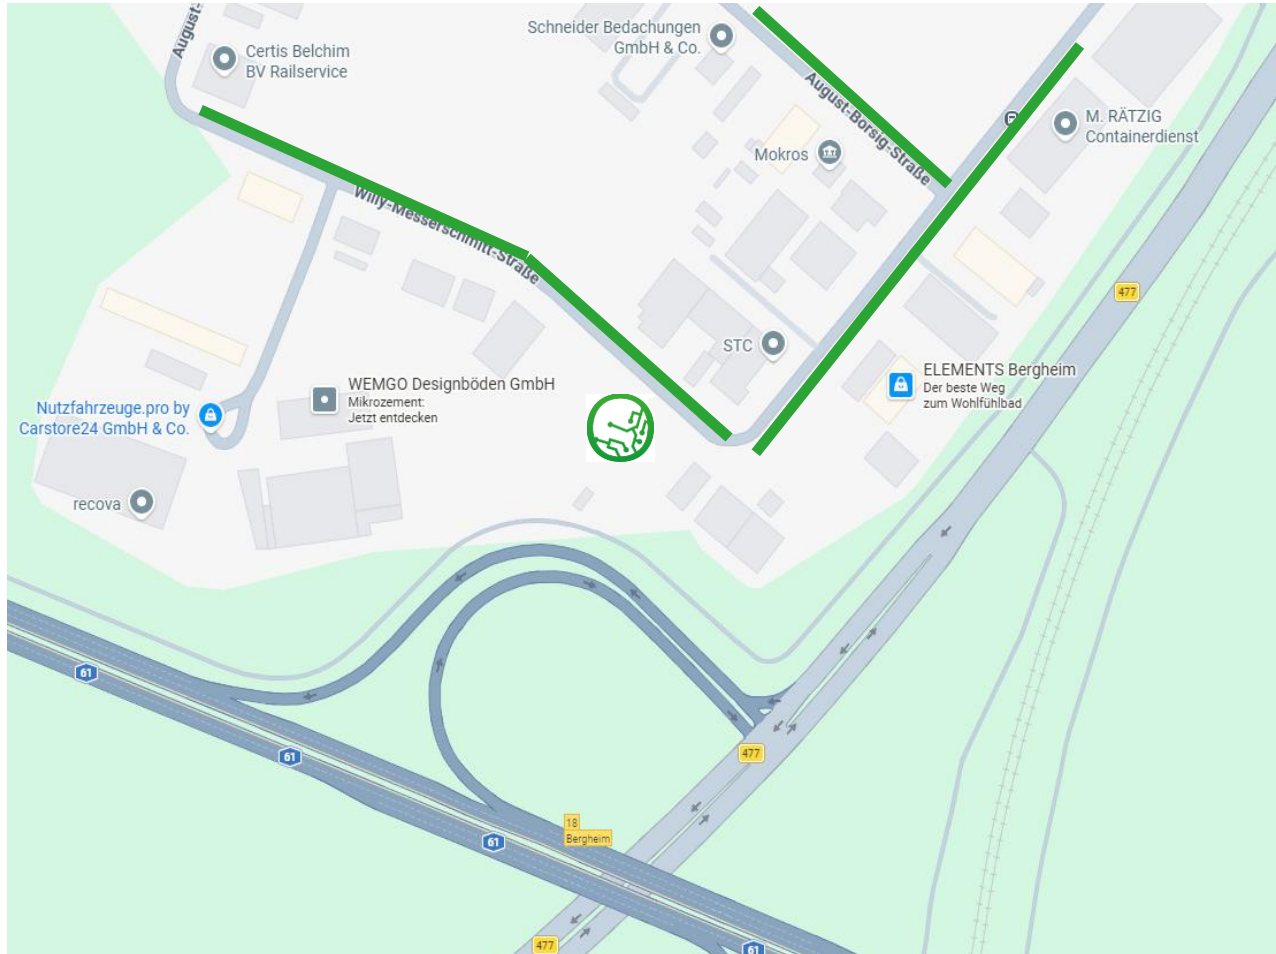

Live demos of selected systems and real-world applications

04

Your questions and thoughts

Open discussion, questions, and exchange on use cases

How to find us

Session

What's in It for You

We give you clear orientation

If you don't know where to start in robotics, we provide a structured overview of the landscape and what really matters

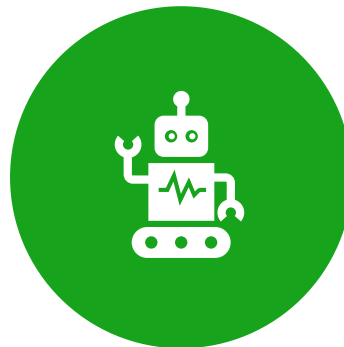

We help you put technologies into context

If you're unsure whether topics like humanoids or robot dogs are relevant for you, we help you better understand and contextualize current technologies

See real systems in action

If you don't just want to understand robotics but actually experience it, you can see real systems live in action - no theory.

Understand how we work

If you're considering working with us but don't fully understand what we do, you'll get to know our systems, our approach, and how we work.

What to Expect - and What Not

Company Introduction

Get to know MYBOTSHOP and how we approach robotics projects

Robotics Landscape Overview

Understand the robotics landscape and explore key fields such as humanoids, robot dogs, and mobile systems

Live Demonstrations

See real robotic systems in action, including platforms from Unitree (e.g. Go2, G1), Ascento, and Segway

Exchange & Use Cases

Discuss applications and explore relevant use cases for your business

No Individual Consulting

This is a general introduction, not a tailored analysis of your specific case

No Project Planning

We do not define detailed implementation plans during the visit

No Deep Technical Consulting

The focus is on overview and experience, not detailed technical discussions

02

Individual Consulting Session

You need Individual Consulting?

Work on your specific use case

Instead of a general overview, we focus directly on your challenges, applications, and goals.

From idea to implementation

Move beyond initial thoughts and translate your ideas into concrete next steps and realistic solutions.

Go deeper with our technical team

Get direct access to our engineers and explore systems in more detail - hands-on and practical..

Low-risk investment

€150 per hour - fully credited if you move forward with a system..

03

What's next

How We Move from Idea to Implementation

Showroom Visit

Experience our robot portfolio live (e.g. Unitree Go1, G1) and explore relevant applications

Inquiry & Qualification

Initial exchange to understand your needs and assess if a showroom visit makes sense

Testing & Rollout

Test the system in your environment and move towards implementation

System Design & Engineering

We define suitable solutions and configure the right robotic setup for your use case
